

Jesse Greenough

(425)-599-3275

Full-Stack Developer | Shoreline, WA

jesse.greenough84@gmail.com

[linkedin.com/in/jessegreenough](https://www.linkedin.com/in/jessegreenough) | github.com/GreenJ84

TECHNICAL SKILLS:

Languages: Markdown, HTML5, CSS, JavaScript, TypeScript, Solidity, Python, Java, SQL, GraphQL, jQuery | **Framework/Libraries:** ReactJS, NextJS, ExpressJs, Bootstrap, TailwindCSS, Material-UI, Apollo Services, Truffle | **Databases:** MySQL, MongoDB, PostgreSQL | **Tools:** Trello, VS Code, VIM, GitHub, Git, GitKraken, DevTools, NodeJS, npm, MySQL Workbench, Mongoose, Axios, JSON Web Tokens, Socket.io, Postman, Jest, Docker, Firebase, AWS EC2, Vercel

TECHNICAL PROJECTS:

Tesla-GClone | Built using TypeScript - NodeJS - ReactJS - Firebase

<https://tesla-gclone.vercel.app>

Full-Stack Serverless React Application - A functional replica of Tesla Inc's ecommerce website

- Utilized TailwindCSS, PostCSS and style components to create a responsive web design mimicking Tesla's original
- Developed the application front-end with ReactJS utilizing Redux for state management
- Integrated Firebase for user authentication and data management
- Managed the projects development with GitKraken visualizer
- Implemented a production repository structure with a CI/CD pipeline via GitHub actions to a Vercel deployment

My Portfolio | Built using TypeScript - NodeJS - NextJS - MongoDB

<https://jesse-greenough-portfolio.vercel.app>

Full-Stack Serverless Next Application - A living portfolio displaying my achievements and personality

- Designed application wireframe and database structure with Balsamiq
- Crafted front-end design and responsiveness with CSS modules
- Developed application with NextJS utilizing server side rendering to integrated MongoDB data retrieval
- Deployed application via host service Vercel with a CI/CD development pipeline.

Apollo Odyssey | Attained Apollo GraphQL Developer Professional and Associate certifications

- Designed and implemented GraphQL APIs utilizing Apollo Server 3, deployed to Apollo Schema Registry.
- GraphQL API testing via Apollo Studio Explorer before integration and deployment
- Deconstructed, separated, and federated a functional production monolith into subgraphs with Apollo Federation
- Deployed client and server applications to Railway hosting services

Adventure Connect | Built using TypeScript - ReactJS - NodeJS - ExpressJS - MongoDB

Full-Stack MERN Application - An Outdoor Event coordination platform for the PNW community

- Utilized ReactJS and Materials-UI for front-end design and development
- Employed JSON Web tokens for authorization and authentication of user access
- Oversaw project SCRUM responsibilities and task delegation with Trello services
- Developed project tests utilizing Jest and React Testing Library
